I hereby certify that this correspondence is being deposited on this day with the United States Postal Service as first class mail in an envelope addressed to: Commissioner of Patents and

David P. Gordon

Reg. No. 29,996

Honorable Commissioner of Patents Trademarks, Wasington, D.C. 20231. and Trademarks narch 6,200Z

Sir:

SUBMITTAL OF DOCUMENTS PURSUANT TO DUTY OF DISCLOSURE

Pursuant to applicant's duty of disclosure under 37 CFR Section 1.56, enclosed is a completed form PTO-1449 as well as copies of the cited documents which relate to the above-referenced patent application. Since this document submittal is being presented prior to the first examination on the merits, no fee is due herewith.

German Patent DE 3924610A1 to Georges discloses a bone fracture distraction pin appts.

The listed documents are brought to the Examiner's attention because they are known to the applicant and/or the applicant's attorney and may be considered by the Examiner to be material to his/her examination. This listing should not be construed as representation that a search has been made or that no better art exists. No inference should be made that the documents are in fact material merely because they are referenced herein.

Moreover, no representation is made that the brief descriptions of the references herein necessarily describe the most material aspects of the references. Further, by this listing, the applicant is not making any admission regarding the relative dates of the invention and listed disclosures.

Respectfully submitted,

David P. Gordon

BASIC-ABSTRACT: The distraction-pin appts. is for use with bone

fractures. It

comprises a first pin (1,2) with forked end (3,4), and longer than a

second one

(9) with hook end (10).

A common clamp (21-26) locks the free ends of the \underline{pins} in position in relation

to each other. This can comprise tension - and compression-loa d stops for the

short and long pins respectively.

USE/ADVANTAGE - Distraction pin appts. for reducing $\underline{\text{bone}}$ fractures is usable in

marrow cavity.
